

Environmentally Friendly, Safer Around Plants & Concrete  
PROFESSIONAL GRADE Ice-Melter – MELTS to -12° F

**Ice & Snow Melting Benefits:**

- **Sub-Zero** - Melting (-12° F)
- **Use Less** - Uniform ideal particle size for optimum spread density
- **Use Less** - High purity salt to ensure rapid melting response
- **Use Less** - Multiple salt sources for Superior performance

**Environmental Benefits:**

- **Safer** for People, Pets & Environment
- **Safer** for Turf Grass, Trees & Shrubs
- **Safer** for Concrete Driveways & Patios
- **Reduces Tracking** of Product Residues
- **Safer** for Soils, Streams, Rivers and Bays

**Applications:**

- Commercial Snow & Ice Control
- Industrial Snow & Ice Control
- Private Snow & Ice Control

PACKAGE SIZE:  
50 lb Bag, 40 x 50 lb Bags/Pallet

**Product Description:**

How much product it takes to melt ice and snow under a given set of difficult conditions is the real measure of "Value". **BioPlex PRO 2 plus BIO-Buffer Ice Melter™** is rated "Superior" in the two primary product characteristics vital to efficient, safe and effective for ice and snow melting. Namely...**Salt Particle Sizing & Salt Particle Purity.**

**Why is this important?** The difference is, your customer calling you to inquire what your 'best price' is on Halite versus calling to reorder **BioPlex PRO 2 plus BIO-Buffer Ice Melter** at a significant, elevated "GP". As you know, there is a significant difference between the **Purchase Price** of ice-melting salts and the **REAL USE COST after application** rate is considered! **PRODUCT PRICE is where the sale starts... REAL COST is why the sale closes.**

**Environmental Benefits:**

**BioPlex PRO 2 plus BIO-Buffer Ice Melter** employs unique, proprietary **salt-buffering** technology to ensure the *ultimate in SAFETY & Environmental Responsibility.* **All Natural BioPlex PRO 2 plus BIO-Buffer Ice Melter** helps neutralize and buffer potential damage and harmful side effects of concentrated soluble salt and chloride residues. It will also **minimize** the unintended consequences resulting from runoff of product residues that negatively impact soils, streams, ponds, rivers and bays.
