BOKASHI

TeraKashi Bokashi Fertilizer is a fermented organic rice bran that enhances soil conditions and increases the productivity, growth and quality of plants.

Now with the added benefit of Malibu Compost, TeraKashi Bokashi fertilizer will help break up clay soil, add organic matter, and improve soil tilth when used as a top-dressing.

Visit Our Website For More Information, as well as complimenting products, such as EM-1® Microbial Inoculant, to increase the benefits to your soil and plants.

BOKASHI

BOKASHI FERTILIZER WITH MALIBU COMPOST

2 - 4 - 2

Plant Fertilizer

TeraKashi Bokashi Fertilizer can be used as a natural, chemical-free fertilizer for all your horticulture plants.

 Simply top dress soil with 1/3 cup per square foot every two weeks.

 For Larger Volumes, mix in 1 to 2% of soil volume with TeraKashi Bokashi Fertilizer.

 For Potting Soil, add at 2% to soil mixtures.

Malibu Compost

TeraKashi Bokashi Fertilizer now has the added benefit of Malibu Compost. Malibu Compost soil is premium, organic, Non-GMO, biodynamic and farm-made for you to grow a safe and healthy garden.

Bu's Blend Biodynamic Compost is a true organic compost that adds beneficial life to your soil, grows healthy food and lush green plants.

Food & Plant Waste Fermentation

TeraKashi Bokashi Fertilizer utilizes rice bran to break down materials into a high quality soil additive. Faster, more compact and far less smell than traditional food waste composting.

Bokshi Buckets: simply add leftovers and sprinkle with TeraKashi Bokashi in layers coating the food and close with the air-tight lid. Once full, let ferment for 1-2 weeks, then bury the waste in your garden or add it to your compost pile or worm bed.

Composting Residue: apply TeraKashi Bokashi on mulch or plant residue at a rate of 1 lbs. per 100 sq. ft.
